

About UltraChip

Formed in late 1999, the company has been profitable since 2003. Our revenue and profit has been growing exponentially. For 2004, we are on track to achieve >500% revenue growth and achieve 7~9% global market share by Q4/04. Based on its current success, UltraChip is planning to broaden its product line and cover other areas in the white-hot mobile-multimedia ASIC arena. We are looking for a highly talented individual to participate in our explosive growth.

Our Vision

The company name, **UltraChip**, alludes to the anticipation of becoming the world's number one ultra performance in IC chip products. Our vision and mission for 2010 are illustrated below. UltraChip is committed to achieve them through our management, R&D, operation, integrated sales teams and advanced standardization.

Profit: Increase revenue for the benefit of our customers as well as stockholders.

Technology: To be the world's number one developer in STN LCD IC driver.

Functionality : Continue to focus on developing products that cost less, use less power, and improve LCD quality.

Quality : Continue to improve product quality, efficiency, and time to market.

Our Products

STN LCD

UltraChip's STN LCD IC drivers are smaller, requires lower power, creates less electromagnetic interference, more dynamic range and higher resolution. It has been certified by many national mobile phone companies. Its consistent quality has won the customers' trust.

VSTN_LCD

UltraChip's VSTN_LCD IC occupies a unique position in the STN industry. Its characteristics include higher scanning rate, higher resolution, less response time, lower power requirements, etc. It has overcome the problem of image residue in animations and achieved the quality close to that of TFT_LCD. Together with more competitive costs, UltraChip's VSTN_LCD IC is a revolutionary product that has extended the life of the entire STN industry.

Our Partners

UltraChip's services range from product design, production, integration to the supply of quality products. Apart from our own R&D and management capabilities, we also rely on the close relationship with our outstanding partners from various fields. These partners include our suppliers, system houses and chip distributors.

System Houses

World Class LCM Manufacturers

Distributors

Capabilities

It's no accident that **UltraChip** developed leading technology and quality in a short period. We're firmly supported by our strong technical team and subcontractors throughout the entire production process, from innovative development, working closely with model and system manufacturers, to the actual production. This support ensures that UltraChip will be the leading company in the LCD IC Driver industry for many generations to come.

Logistics : Owing to a complete and professional vertical supply chain, UltraChip is able to access more resources and enjoy more flexibility in delivery, services, and costs. The excellent supply chain combined with our strong team support has equipped UltraChip with better management and prepared us for future growth.

Quality : UltraChip was awarded by Sony Ericsson, one of the world's top mobile phone manufacturer, and accredited with ISO9001:2000.

Our quality has been tested and approved by a Japanese company who is well-known for its strict demand for quality. This company has adopted our products in key product lines and is working with us on future development.

Engineering : UltraChip is comprised of a group of experts with relevant industrial experience who have access to state-of-the-art R&D resources. Our recruitment is based on talent and expertise. The team's intelligence and experience have made it easier to achieve mutual understanding and common goals. This gives us the flexibility to respond to rapid market changes.

Manufacturing : UltraChip's technical development capability and mass production experience in color STN_LTD IC Driver are equivalent to that of large international companies. Unique innovative technology and active supply chain management give UltraChip the production advantage of low cost and high flexibility, which has impressed many international companies.

UltraChip in Your Life

UltraChip's products are everywhere in your life. You can find UltraChip's IC driver in your mobile phone, PDA, MP3 player, electronic dictionary and game consoles. UltraChip's driver IC shortens the distance between the electronic devices and you and enriches your life with wonderful visual pleasure. UltraChip enriches your life with vivid animation, theatrical performance and interesting interactive entertainment.
